### Native (Luo)

Hardworking and passionate job seeker with strong organizational skills eager to secure entry-level Software Engineering position. Ready to help team achieve company goals.

## Work History

2019-12 -  
2021-09

### Chief Technology Officer (C.T.O)

*Golden Eagles Production, Kisumu, Nyanza*

- Used coordination and planning skills in order to push the registration of our startup company to a success.
- worked to maintain outstanding attendance record for my fellow colleagues thereby ensuring each colleague met the working goal of 40 hours per week
- Conducted research and gathered information that would later help in the daily troubleshooting of computer systems and network problems.
- Worked with different customers to understand needs and provide excellent web development services.
- Led the team in the development of full stack web projects for different clients.
- Used Microsoft Word and other software tools to create documents and other communications.
- Expanded on my duties to help the media department in tasks like photography, photo editing, video coverage and sound engineering.

2021-04 -  
2021-05

### COVID19 Survey Navigator

*ICAP, Kisumu, Nyanza*

- Aided in Data Collection and analysis for a study involving the impacts of COVID19 to adolescents and young adults ranging from age 16 to 24.
- Creating daily reports based on the study outcome, interviewee turn ups, behavior and challenges
- Attending of meetings before and after the daily routine workout.
- Maintained the tablets that were used for collecting the data from the interviewees by ensuring they had enough power and that they were in good conditions before using them
- Designed name tags using Libre office draw(A linux software for graphic design). During this design I came up with a personal idea to implement an application that would make the name tag, badges and cards generation an easy task by just entering the required details and letting the app do the rest of the work for you. This personal project is still a working progress.

2019-01 -  
2019-04

### Student IT Engineer (Attachment)

*Kenya Power And Lighting Company (KPLC), Kisumu, Nyanza*

- Troubleshooting of Computer Networks
- Daily Checking of emails and updates from the company
- performed preventive maintenance to Mainframe and personal Computers within the company and it's branches within the nyanza region
- Ensuring IT service help-desk is up and running
- Collection of monthly inventories to ensure information system security is updated.
- Repaired and troubleshooted network cables

## Education
